## All-in-one development platform for web3 games

Sequence media kit 2023

About Sequence

Onboard, monetize, retain, and grow your players with **Sequence**, the all-in-one web3 gaming development platform. With Sequence, you can easily incorporate web3 experiences into your game without sacrificing your players' experience. From collectible cosmetics and ownable rewards to fully on-chain experiences, Sequence's modular stack solves the technical challenges so you can focus on creative execution: seamless wallet solutions, Token and NFT APIs, blockchain Indexer, Relayer for gasless transactions, Payments, Node Gateway, Marketplaces, SDKs for mobile, Unity, and Unreal Engine; and more.

Sequence is built by **Horizon**, the creators of **Skyweaver** — named **2022's best blockchain game** — and co-authors of most Account Abstraction protocols available today.

Testimonials

"If you talk about all web3 app infrastructure and app development teams, Sequence is #1. Their products are the best out there. They understand UX and they understand building high-quality infra tech that serves today's requirements and future needs for applications."
— **Sandeep Nailwal, Co-Founder at Polygon**

"We leverage Sequence to make our web3 game accessible for anyone. We looked at other solutions, and no one else has the same depth and quality as Sequence."
— **Steve Woody, Partner at Sunflower Land**
